

# ABI15010 – ABIOSH International basic Fire Safety Course

## COURSE OVERVIEW

Students will receive all the knowledge and skills necessary to assess Fire Risk and how Fire Prevention can be managed. This course is designed for employees, supervisors and managers who may have or are looking to develop their careers that require elements of fire responsibility in the workplace.

The training is designed and is suitable for individuals who are looking to improve their fire awareness skills and maybe looking towards becoming officers within a fire fighting, investigation or prevention role and may have no formal training or experience.

On completing the training and having passed the relevant assessment necessary to deem competency, the student will be certificated by ABIOSH.

### **Pre-requisite – none**

**Duration – 4 days taught course** – however students will be required to complete evening study

### **Target Audience**

Health and Safety Personnel Supervisors, Engineers and Managers Individuals directly responsible for a Company's Fire Safety Safety Committee Representatives

### **Course Content:**

Syllabus:

- Managing Fire Safety
- Principles of Fire and Explosion
- Causes and Prevention of Fire

- Fire Protection in Buildings
- Safety of People in the Event of a Fire
- Fire Risk Assessment

Assessment – Fire Safety Exam of 1 hour plus practical application

#### **Element 1**

- Outline the moral, legal and financial consequences of inadequate management of fire safety
- Outline the legal framework for the regulation of fire safety in new, altered and existing buildings (including government guidance)
